RESTRICTION

1. Applicant's amendment filed on 7/27/01 has been entered. Claims 1-26 have been canceled. Claims 27-60 have been entered, Claims 27-~~40~~ are pending in the application.
2. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions, which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in response to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 27-39, 53 –54 drawn to polypeptide and a method of use as a vaccine. Further election of invention required.

Group II, claims 40-52 and 60 drawn to DNA, vector, host cell and a method of expressing polynucleotide and a method of producing polypeptide. Further election of invention required.

Group III, claim 55 drawn to an antibody. Further election of invention required.

Group IV, claim 56 drawn to a method for inducing an immune response using a polypeptide. Further election of invention required.

Group V, claim 57 drawn to a method for diagnosing M.catarrhalis infection using peptide or antibody. Further election of invention required.

Group VI, claim 58 drawn to a method for inducing immune response using polynucleotide. Further election of invention required.

Group VII, claim 59 drawn to a method for the treatment of M.catarrhalis infection using antibody. Further election of invention required.

The inventions listed as Groups I-VII do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

Art Unit: 1645

Group I is directed to a polypeptide, method for producing the polypeptide and a method of use as vaccine which is the first product and first method of using the product. The special technical feature is the polypeptide, which is made up of amino acids. Groups II-III are drawn to structurally different products such as nucleic acids and antibodies which do not require each other for their practice and do not share the same or a corresponding technical feature. The Group IV-VII inventions are drawn to methods having different goals, method steps and starting materials, which do not require each other for their practice and do not share the same or a corresponding technical feature. Note that PCT Rule 13 does not provide for multiple products or methods within a single application. Since the special technical feature of the Group I invention is not present in the Group II-VII claims, and the special technical features of the Group II-VII inventions are not present in the Group I claims, unity of invention is lacking.

DISTINCT INVENTIONS

3. This application contains claims directed to more than one invention in each group. These inventions are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1 as different sequences are considered as unique, different and distinct inventions.

The inventions are as follows:

SEQ.ID.NOS. 1, 2, 3 or 4

The inventions listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the inventions lack the same or corresponding special technical features for the following reasons: Sequences listed as SEQ.ID.NOS; 1-4 are different to each other and lack the same or corresponding special technical features. If applicant elects one SEQ.ID.NO from group II, then applicant is advised to elect the epitopes of

Art Unit: 1645

that sequence with specific nucleic acid (epitopes with specific nucleic acid numbers of that sequence) but not a generalized formula as recited in claims 43, 48.

4. Applicant is required, in reply to this action, to elect a group and one sequence and identify the SEQ.ID.NO to which the claims shall be restricted. The reply must also identify the claims readable on the elected invention, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Padmavathi v Baskar whose telephone number is (703) 308-8886. The examiner can normally be reached on M-F (6:30A.M-4: 00 P.M.) First Friday off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Lynette Smith can be reached on (703) 308-3909. The fax phone numbers for the organization where this application or proceeding is assigned are (703) 308-4242 for regular communications and (703) 308-4242 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-1235.
